PROFESSIONAL SUMMARY

Motivated undergraduate student with strong problem-solving and communication skills, eager to apply my knowledge in a professional environment. Quick to learn, adaptable, and passionate about gaining experience while contributing to organizational success. Seeking an opportunity to start my career, develop my skills, and grow professionally.

WORK EXPERIENCE

Intern | Internship Jan 2026 – Apr 2026
IIT Ropar India

- **Built a Retrieval-Augmented Generation (RAG) pipeline** to analyze government scheme PDFs and generate eligibility decisions.
- **Engineered** a document processing pipeline using **pdfplumber** with chunking and keyword-based retrieval.
- **Leveraged Google Gemini LLM** for context-aware reasoning and structured JSON output generation.
- **Implemented explainable AI** by surfacing document snippets and page-level citations for each decision.

Technologies / Skills Used: Google Gemini LLM, React, MongoDB, Express, Tailwind CSS, Node.js

EDUCATION

Gayatri Vidya Parishad College of Engineering | India Jun 2024 – Present
Bachelor of Technology in Computer Science CGPA: 9.1

- **Relevant Coursework:** AI, ML, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming

Andhra Polytechnic | India Sep 2021 – May 2024
Diploma in Computer Engineering CGPA: 9.3

- **Relevant Coursework:** Operating Systems, DBMS, Computer Networks, Object-Oriented Programming

PROJECTS

DevConnect – MERN Stack Referral Platform | DevConnect | Website

- **Developed a full-stack MERN application** to optimize employee referral workflows.
- **Designed and implemented RESTful APIs** for user profile management, referrals, and messaging.
- **Integrated Socket.IO** for real-time messaging between job seekers and employees.
- **Implemented JWT-based authentication** and role-based access control (RBAC) to safeguard user data and dashboards.

Technologies / Tools Used: MERN, Socket.IO

Niti-Setu: RAG-Powered Government Scheme Eligibility Engine | Niti-Setu | Website

- **Developed a full-stack RAG-based application** utilizing **Node.js** and **React** to assess farmer eligibility for government schemes based on official PDFs.
- **Engineered a semantic retrieval pipeline** with **MongoDB Atlas Vector Search**.
- **Integrated Google Gemini** for context-aware reasoning and generating structured eligibility decisions with source citations.

Technologies / Tools Used: MERN, MongoDB Atlas, Vector Search

SKILLS

Databases:	MongoDB, MySQL
Frameworks & Libraries:	React.js, Node.js, Express.js, TensorFlow, scikit-learn
Programming Languages:	C, C++, Python, SQL, JavaScript
Soft Skills:	Problem-solving, Communication, Team Collaboration
Tools & Platforms:	Git, GitHub, VS Code, Postman

AWARDS & ACHIEVEMENTS

- **Technical Lead** for the **AI Club** at **GVP College**.
- Coordinated “**Tool Wave**,” a technical event that enhanced peer learning by focusing on **AI tools**, **digital productivity**, and **practical tech applications**.
- Achieved a **1680+ rating on LeetCode** and earned a **2-Star rating on CodeChef**, demonstrating exceptional competitive programming and problem-solving skills.

CERTIFICATIONS

- **Machine Learning Foundations** – completed through Infosys Springboard.
- **Cisco Networking Basics** – completed through Cisco Networking Academy.
